README

STEPS TO RUN:

- Download the dataset from the link provided in report
- Create a folder called data_dir upload train dataset, test dataset, dev dataset and dev solutions
- These can be found in data folder in SIG2022 Folder
- Next create a checkpoint_dir folder go to SIG2022/systems/language upload the hparams.json file from this folder into checkpoint_dir folder
- Run the train_model() function pass four parameters data_dir,checkpoint_dir,train_file,dev_file
- Run the test() function pass two parameters data_dir,checkpoint_dir
- Lastly run the compare_words() function
